

Linklaters Debate Challenge

This house believes that children can make a big difference to the environment

What do you do to help the environment?

What is your carbon footprint?

What are the biggest challenges to the environment?

Are there examples of children who have done something big to help the planet?

Is it only governments that can save the planet or can individuals make a difference?

Think of three things which would be a help for the environment

How can you get your voice heard? Who can you influence?

How many children are there? Could they make a big difference together?

Who creates more pollution, adults or children?

Is it too late for anyone to save the world?

Do things like recycling and turning off lights make a big difference?

Do you think about the environment when you spend your pocket money?
